

Case Study

Client Profile:

AXA is a worldwide leader in insurance and asset management. AXA Group offer insurance, savings and investment products and services. It engages in global investment banking, securities, investment management, insurance, and other financial services. AXA is positioned as a global leader in Financial Protection.

Tecnology Used:

Azure

Business Situation:

AXA used Lotus Notes as their primary mail service. The disadvantage here was it was complex and used many hardware resources and grew expensive as the employee-base using the Lotus Notes grew. Hence the messaging service had to be migrated.

Solution Approach:

The existing messaging environment was reviewed thoroughly and total database size was gauged. The complete messaging service was migrated to Outlook 365 using Azure. With this, AXA leveraged the internet to share corporate content. Sharing information became easy with minimal use of resources. It was a scalable solution as well.

For handling all business activities from single system Microsoft Dynamics NAV on virtual machines using Azure was deployed. On premise infrastructure was setup with servers placed and maintained in-house. With the migration solution a global standard infrastructure was enabled in an economical way.

Benefits & Results:

- ❑ One touch access to E-mail, calendar, files and documents with data reports
- ❑ Anywhere access
